

KIRKLEES HEALTH & WELLBEING BOARD	
MEETING DATE:	29th September, 2016
TITLE OF PAPER:	Right Care, Right Time, Right Place: Consultation deliberation
1. Purpose of paper	<p>The purpose of this paper is to update the Health and Wellbeing Board on the progress made in relation to public consultation and set out the work that the CCGs will be progressing in order to undertake post-consultation deliberation in preparation for the CCGs' Governing Body meeting in parallel on 20th October.</p>
2. Background	<p>The Right Care, Right Time, Right Place programme is the commissioners' response to the case for change that was developed as part of the Strategic Services Review undertaken in 2013. From this case for change and the feedback from our engagement, we know that significant changes are required in order to ensure health and social care services are fit for the future. There are three interlinked pieces of work: Calderdale Care Closer to Home Programme; Kirklees Care Closer to Home Programme; and the Hospital Services Programme. Collectively, these programmes have developed proposals for what the future community services in Calderdale and Kirklees and the future hospital services in Calderdale and Greater Huddersfield could look like.</p> <p>In January 2016, the Governing Bodies of Calderdale Clinical Commissioning Group (CCG) and Greater Huddersfield CCG decided that they were ready to proceed to public consultation. The Consultation Plan was presented to the Calderdale and Greater Huddersfield Joint Health Scrutiny Committee (JHOSC) at their meeting in January 2016 and updated to reflect feedback from the Committee. The Consultation Document, Consultation Survey and other consultation materials were completed in March 2016. The Consultation document and Consultation Survey incorporated feedback from JHOSC.</p> <p>The CCGs commenced public consultation on 15th March, 2016. Public consultation finished on 21st June, 2016.</p> <p>This report sets out the progress made during the post-consultation deliberation period.</p>
3. Proposal	<p>3.1 Post Consultation deliberation.</p> <p>The post consultation deliberation period is when the CCGs:</p> <ul style="list-style-type: none"> • Consider the Report of findings and their response to the issues and concerns that have been raised. • Identify any Equality and Health inequality implications that have been identified as a result of the consultation. • Consider the response to the consultation from the Calderdale and Huddersfield Joint Health Scrutiny Committee and their response to the issues and concerns that have been raised • Consider the response from Healthwatch and their response to the issues and concerns that have been raised. <p>3.1.2 Consultation Report of findings</p> <p>The independent company has analysed all the responses submitted to the consultation</p>

and produced The Consultation Report of Findings. The report was published on 25th August, 2016 and considered by the Calderdale and Kirklees Joint Health Overview and Scrutiny committee (JHOSC) on 7th September.

As part of post-consultation deliberation, the CCGs are using the report to understand and assess the impact of the consultation response on the proposals and understand and consider the issues and concerns raised.

In addition, the programme has undertaken a further stakeholder event to enable stakeholders to consider the findings from consultation and provide their contribution to the CCGs' deliberation process. This event took place on 13th September.

3.2.1 Equalities and Health Inequalities Impact Assessment (EHIA)

In order to identify any Equality and Health inequality implications that have been identified as a result of the consultation, the Programme has undertaken an Equalities and Health Inequalities Impact Assessment (EHIA). The report identifies any potential trends in responses, determining if a particular protected characteristic group would experience the proposed changes differently, whether negatively or positively. The report provides an assessment of the potential impact on both equality and health inequalities, enabling commissioners to pay due regard to their Equality and Health Inequality duties.

3.2.2 Response from the Calderdale and Huddersfield Joint Health Scrutiny Committee (JHOSC)

In line with the obligation on Commissioners under regulation 23 of the Local Authority (Public Health, Health and wellbeing boards and Health Scrutiny) Regulations 2013, the CCGs have advised that they require the JHOSC to provide comments in response to the consultation by midnight on 3rd October, 2016.

It is anticipated that the JHOSC will consider their response when they meet on 3rd September and that a response will be provided within the deadline.

3.4 Response from Healthwatch

Healthwatch have undertaken a separate consultation process in relation the consultation. Their report has been submitted to both JHOSC and the CCGs.

4. Financial Implications

There are significant financial implications associated with the proposals. These have been outlined in the Pre-Consultation Business Case.

5. Sign off: Carol McKenna, Chief Officer, Greater Huddersfield Clinical Commissioning Group.

6. Next Steps: The report is for information

7. Recommendations

The Health and Wellbeing Board is asked:

1. To note the work required to undertake post-consultation deliberation together with the other known key dates and events within the same timescale.

8. Contact Officer: Jen Mulcahy, Programme Manager, jen.mulcahy@calderdaleccg.nhs.uk
