

KIRKLEES HEALTH & WELLBEING BOARD	
MEETING DATE:	29th June 2017
TITLE OF PAPER:	Health and social care integration in Kirklees – our case for change
1. Purpose of paper	<p>To ask the Board to endorse the proposed direction of travel for the development of a single integrated commissioning system for Kirklees, and support the development of a programme plan to further develop and implement the proposed approach.</p> <p>There will be a presentation setting out the case for change at the Board meeting.</p>
2. Background	<p>The Board received an update on integration at the meeting on 30th March 2017 setting out the feedback from the Peer Challenge earlier in March 2017, progress with the integration of commissioning across Kirklees and the integration of the delivery of care outside hospital.</p> <p>The next steps set out in that paper include development of our vision for integration and a ‘case for change’ for integration with a simple narrative that clearly sets out our ambitions and the benefits we expect.</p> <p>There have been extensive discussions with CCG Governing Bodies and senior managers from across the CCGs and Council over recent weeks. This has enabled us to develop a case for change that will be presented at the Board meeting.</p> <p>The CCGs and Council have established a Steering Group and Programme Board to oversee the next phase of development.</p>
4. Financial Implications	<p>None</p>
5. Sign off	<p>Carol McKenna, Greater Huddersfield CCG Chief Officer Richard Parry, Director for Commissioning, Public Health and Adult Social Care</p>
6. Next Steps	<ul style="list-style-type: none"> • Case for Change will be discussed further with CCG Governing Bodies and presented for endorsement at Governing Body meetings in early July • Further discussions between CCG and Council Leadership in July • Programme plan being developed for sign off by the programme board

7. Recommendations

That the Board

- Endorse the direction of travel set out in the case for change
- Support the development of a programme plan to further develop and implement the proposed approach.
