Ref DEV JE/D126-197

20-3-2021

Dear Madam

Regarding the above reference DEV/JE/D126-197. We had opportunity to speak to the Green Councillors at the Scout hut where we wrote our suggestions for Traffic Calming on New Ladhe Hill and we put forward several suggestions and Speed humps were strongly rejected.

SPEED Humps would be a danger on New Ladhe Hill, better take off and landings and the last thing I want is a car hitting my wall and an injured person in my Garden! SPEED BUMPS unfortunately would provide a Saalam

They would cause damage to cars, which for the people driving the car, would probably not be a problem.

New Lathes Hill is not a rat run because only a connecting road, the problem lies with people using the road to get a thrill from speeding. The majority of people use the road appropriately perhaps keep the funding until an answer to the problem, that satisfies both the Council and residents of New Lathes Hill.

We gave several ideas perhaps to speak to the council (as love lives on New Lathes Hill) about the suggestions offered.

Thank you for your help.

Yours faithfully
