

VCSE Investment Strategy participants

Breakdown of VCSE organisations per locality

30 groups and organisations took part in engagement activities to develop the VCSE Investment Strategy. However, we recognise that there was not an equal distribution of groups engaging across all places in Kirklees. We have carried out further engagement activities to address this, through the Community Buildings Support Survey and the Community Organisations Support Survey. The findings of these activities are directly influencing our action planning and will influence future infrastructure commissions.
