

Report title: Annual Report on Treasury Management 2023/24

Meeting:	Corporate Governance and Audit Committee
Date:	28 June 2024
Cabinet Member (if applicable)	Leader of the Council.
Key Decision Eligible for Call In	Yes
Purpose of Report Financial Procedure Rules (Section 9.5) require that the Council receives an annual report on Treasury Management activities for the previous financial year. The report to this committee reviews borrowing and investment performance before it is considered by Cabinet and Council	
Recommendation and Reasons Corporate Governance and Audit Committee are asked to note the treasury management performance in 2023/24 as set out in this report, prior to its submission to Cabinet and Council.	
Resource Implications: There are no additional resource implications required as part of this report as it relates to Treasury Management activities undertaken in 23/24.	
Date signed off by <u>Strategic Director</u> & name Is it also signed off by the Service Director for Finance? Is it also signed off by the Service Director for Legal Governance and Commissioning?	N/A Kevin Mulvaney – 13/6/2024 Sam Lawton – 19/06/2024

Electoral wards affected: N/A

Ward Councillors consulted: N/A

Public or private: Public

Have you considered GDPR: Yes – there is no personal data within the budget details and calculations set out in this report and accompanying Appendices

1. Summary

- 1.1 The Council's treasury management operation for the year has followed the strategy approved by Council on 8 March 2023 (see paragraph 2.1.4 below).
- 1.2 The treasury management budget underspent by £6.1m against a budget of £21.9m. The variations in the budget are summarised below:-

	Budget (£m)	Actual (£m)	Variation (£m)
Interest payable	16.6	18.9	2.3
Investment income	(1.0)	(3.3)	(2.3)
MRP net of fees*	6.3	0.2	(6.1)
Total	21.9	15.8	(6.1)

During the year interest costs increased due to rising interest rates, and the amount and timing of borrowing compared to budget assumptions. The increased interest costs have been offset by gains on investment income along with slippage in the capital plan.

- 1.3 The Council complied with its treasury management prudential indicators in the year (see Appendix 5).
- 1.4 Investments averaged £59.9 million and were largely deposited in instant access accounts earning an average interest rate of 5.26%.
- 1.5 Total external borrowing at 31 March 2024 increased by £93.5 million to £707.3 million (£613.8 million as at 31 March 2023). The Council took £190.0 million new Government long term loans from the Public Works Loan Board (PWLb) (see paragraph 2.6.4 for more detail) and an additional £10.0 million Local Authority medium term 2-to-3-year loans (see paragraph 2.6.5 for more detail).
- 1.6 The large increase in long term loans was a result of borrowing for the capital plan, re-financing existing borrowing maturing during the year and a reduction in reserves.
- 1.7 The Council converted temporary borrowing into fixed rate loans which accounts for 95.19% of total long-term debt (see paragraph 2.6.6) giving the Council stability in its interest costs and minimising exposure to fluctuating short term rates.
- 1.10 During 2023/24 an external review of MRP identified an overprovision of £34.2m in total, allowing for a further in-year unwind of £6.3 million resulting in zero MRP charged to revenue in year. The £0.2m in the table at 1.2 relates to fees incurred.

2 Information required to take a decision

2.1 Introduction

- 2.1.1 The Council has adopted the CIPFA Treasury Management in the Public Services: Code of Practice (the CIPFA Code) which requires the Council to approve, as a

minimum, treasury management semi-annual and annual outturn reports. The Council operates its treasury management service in compliance with this Code and various statutory requirements.

- 2.1.2 This report includes the requirement in the 2021 Code, mandatory from 1st April 2023, of reporting of the treasury management prudential indicators. The non-treasury prudential indicators are incorporated in the Council's normal revenue and capital monitoring report.
- 2.1.3 Financial Procedure Rules require that the Council receives an annual report on Treasury Management activities for the year. Cabinet is responsible for the implementation and monitoring of the treasury management policies. Corporate Governance and Audit Committee undertake a scrutiny role with regard to treasury management.
- 2.1.4 The Council's treasury management strategy for 2023/24 was approved at a meeting on 8 March 2023. The Council has borrowed and invested substantial sums of money and is therefore exposed to financial risks including the loss of invested funds and the revenue effect of changing interest rates. The successful identification, monitoring and control of risk remains central to the Council's treasury management strategy and that borrowing is undertaken on a prudent, affordable and balanced basis.

2.2 The Economy and Interest Rates

- 2.2.1 The UK economy entered a technical recession in the second half of 2023, as growth rates of -0.1% and -0.3% respectively were recorded for Q3 and Q4. Over the 2023 calendar year GDP growth only expanded by 0.1% compared to 2022. Of the recent monthly data, the Office for National Statistics reported a rebound in activity with economy expanding 0.2% in January 2024. While the economy may somewhat recover in 2024, the data suggests that prior increases in interest rates and higher price levels are depressing growth, which will continue to bear down on inflation throughout 2024.
- 2.2.2 UK inflation continued to decline from the 8.7% rate seen at the start of 2023/24. By the last quarter of the financial year headline consumer price inflation (CPI) had fallen to 3.4% in March but was still above the Bank of England's 2% target at the end of the period. The core measure of CPI, i.e. excluding food and energy, also slowed in February to 4.5% from 5.1% in January, a rate that had stubbornly persisted for three consecutive months. In the February 2024 Monetary Policy Report (MPR) the Bank's expectations for the UK economy were positive for the first half of 2024, with a recovery from the mild recession in the second half of 2023 being gradual. Headline CPI was forecast to dip below the 2% target quicker than previously thought due to declining energy prices, these effects would hold inflation slightly above target for much of the forecast horizon.
- 2.2.3 Labour market data provided a mixed message for policymakers. Employment and vacancies declined, and unemployment rose to 4.3% (3mth/year) in July 2023. The same month saw the highest annual growth rate of 8.5% for total pay (including bonuses) and 7.8% for regular pay growth (excluding bonuses). Thereafter, unemployment began to decline, falling to 3.9% (3mth/year) in January and pay growth also edged lower to 5.6% for total pay and 6.1% for regular pay, but remained

above the Bank of England's forecast.

- 2.2.4 Having started the financial year at 4.25%, the Bank of England's Monetary Policy Committee (MPC) increased Bank Rate to 5.25% in August 2023 with a 3-way split in the Committee's voting as the UK economy appeared resilient in the face of the dual headwinds of higher inflation and interest rates. Bank Rate was maintained at 5.25% through to March 2024. The vote at the March MPC meeting was 8-1 in favour of maintaining rates at this level, with the single dissenter preferring to cut rates immediately by 0.25%.
- 2.2.5 Although financial markets shifted their interest rate expectations downwards with expectations of a cut in June, the MPC's focus remained on assessing how long interest rates would need to be restrictive in order to control inflation over the medium term. Following this MPC meeting, Arlingclose, the Council's treasury adviser, maintained its central view that 5.25% remains the peak in Bank Rate and that interest rates will most likely start to be cut later in the second half of 2024. The risks in the short-term are deemed to be to the downside as a rate cut may come sooner than expected, but then more broadly balanced over the medium term.
- 2.2.6 Sentiment in financial markets remained uncertain and bond yields continued to be volatile over the year. During the first half of the year, yields rose as interest rates continued to be pushed up in response to rising inflation. From October they started declining again before falling sharply in December as falling inflation and dovish central bank attitudes caused financial markets to expect cuts in interest rates in 2024. When it emerged in January that inflation was stickier than expected and the BoE and the Federal Reserve were data dependent and not inclined to cut rates soon, yields rose once again, ending the period some 50+ bps higher than when it started. Over the financial year, the 10-year UK benchmark gilt yield rose from 3.44% to peak at 4.75% in August, before then dropping to 3.44% in late December 2023 and rising again to 3.92% (28 March 2024). The Sterling Overnight Rate (SONIA) averaged 4.96% over the period to 31st March.

2.3 Local Context

- 2.3.1 On 31 March 2024, the Council had net borrowing of £668.2 million arising from its revenue and capital income and expenditure. The underlying need to borrow for capital purposes is measured by the Capital Financing Requirement (CFR), while balance sheet resources are the underlying resources available for investment. These factors are summarised in Table 1 below.

Table 1: Balance sheet summary

	2022/23 £m actual	2023/24 £m actual
General Fund CFR - Non PFI	617.0	663.2
PFI	35.5	33.6
HRA CFR - Non PFI	168.0	163.7
PFI	42.7	40.6
Total CFR	863.2	901.1
Less: PFI debt liabilities	78.2	74.2
: Other deferred liabilities	3.5	3.4
Borrowing CFR	781.5	823.5
Less external borrowing *	613.8	707.3
Internal (over) borrowing	167.7	116.2
Total borrowing (investments)	781.5	823.5
Less: Balance sheet resources	210.6	155.3
Net borrowing (investments)	570.9	668.2
Investments	44.0	39.1

* shows only loans to which the Council is committed

2.3.2 The treasury management position at 31 March 2024 and the change during the year is shown in Table 2 below.

Table 2: Treasury Management Summary

2.4 Investment Activity

- 2.4.1 The CIPFA Treasury Management Code now defines treasury management investments as those investments which arise from the Council's cash flows or treasury risk management activity that ultimately represent balances that need to be invested until the cash is required for use in the course of business.
- 2.4.2 Both the CIPFA Code and government guidance require the Council to invest its funds prudently, and to have regard to the security and liquidity of its treasury investments before seeking the optimum rate of return, or yield. The Council's objective when investing money is to strike an appropriate balance between risk and return, minimising the risk of incurring losses from defaults and the risk of receiving unsuitably low investment income.
- 2.4.3 The Council's overall Treasury Management Strategy prioritises security and liquidity of its investments before seeking a higher rate of return. which was adhered to in 2023/24.
- 2.4.4 As demonstrated by the liability benchmark in this report, the Council expects to be a long-term borrower and new treasury investments are therefore primarily made to manage day-to-day cash flows using short-term low risk instruments. The existing portfolio of strategic pooled funds will be maintained to diversify risk into different asset classes and boost investment income.
- 2.4.5 The Council's treasury management investments totalled £39.1 million as at 31 March 2024 (£44.0 million 31 March 2023). The Council invested an average balance of £59.9 million externally during the year (£61.1 million 2022/23). Interest income of £2.6 million was generated through these investments (£1.0 million 2022/23) and £0.4 million dividend income from the CCLA Property Fund (£0.4 million 2022/23). Appendix 1 shows where investments were held at the beginning of April 2023, the end of September 2023 and the end of March 2024, by counterparty, by sector and by country. The Council's average lending rate for the year was 5.26% (1.92% 2022/23).
- 2.4.6 The majority of investments were placed in liquid instruments such as instant access bank deposit accounts, DMO (Debt Management Office) and Money Market Funds (MMFs). MMFs offer greater diversification of counterparties, thus lowering risk as well as instant access.
- 2.4.7 The bank rate increased by 1% over the period from 4.25% at the beginning of the year to 5.25% at the end of March 2024. Short term rates peaked at 5.7% for 3-month rates and 6.7% for 12-month rates during the period, although these rates subsequently began to decline towards the end of the period. Money Market Rates also rose and were between 3.98% at the start and 5.27% at the end of year.
- 2.4.8 The Council continues to hold £10 million investment in the Local Authorities Pooled Investment Fund (LAPF). The Local Authorities Property Fund was established in 1972 and is managed by CCLA Fund Managers. As at March 2024 there are property assets under management of £1,042 million. The Fund aims to provide investors with regular revenue income and long-term price stability, and it is an actively managed, diversified portfolio of UK commercial property. It principally invests in UK assets but may invest in other assets.

- 2.4.9 The fund returned a gross dividend yield of 3.60% in 2023/24 (3.09% 2022/23) and net income of £0.4 million was received by the Council in 2023/24 (£0.4 million in 2022/23).
- 2.4.10 The market background for commercial property improved marginally in 2023 and was more stable, in contrast to the very challenging backdrop of 2022. Low transactional volumes were a constraint on valuations and made prospective sellers and buyers more cautious. Although many sectors lacked momentum, there was growing confidence in the longer-term outlook as occupier demand and rental markets held up. Industrial and retail warehousing sectors remained strong, but the retail and office sectors remained weak, the latter continuing to be hindered by low occupancy from hybrid working practices.
- 2.4.11 Strategic fund investments are made in the knowledge that capital values will move both up and down over time. Unrealised cumulative capital losses of £1.5 million will not have an impact on the General Fund as the Council is utilising a government statutory override for pooled investment funds. Under the Regulations, gains and losses resulting from unrealised fair value movements, that otherwise must be recognised in the income and expenditure account under IFRS9, are not currently charged to the revenue account, and must be taken into an unusable reserve account.
- 2.4.12 In April 2023 the Department for Levelling Up, Housing and Communities (DLUHC) published the full outcome of the consultation on the extension of the statutory override on accounting for gains and losses on pooled investment funds. The override has been extended until 31st March 2025, but no other changes have been made; whether the override will be extended beyond this date is unknown but commentary to the consultation outcome suggests it will not. The Council will discuss with Arlingclose the implications for the investment strategy and what action may need to be taken.

2.5 Borrowing Update

- 2.5.1 CIPFA's 2021 Prudential Code is clear that Local Authorities must not borrow to invest primarily for financial return and that it is not prudent for Local Authorities to make any investment or spending decision that will increase the Capital Finance Requirement (CFR) and so may lead to new borrowing, unless directly and primarily related to the functions of the Council. PWLB loans are no longer available to buy investment assets primarily for yield unless these loans are for refinancing purposes.
- 2.5.2 The Council has not invested in assets primarily for financial return or that are not primarily related to the functions of the Council. It has no plans to do so in the future.
- 2.5.3 Borrowing is permitted for cashflow management, interest rate risk management, to refinance current borrowing and to adjust levels of internal borrowing. Borrowing is also allowed for financing capital expenditure primarily related to the delivery of a Local Authority's function.
- 2.5.4 Interest rates have seen substantial rises over the last two years, although these rises have now begun to plateau. Gilt yields fell in late 2023, reaching lows in December 2023 before rebounding to an extent in the first three months of 2024. Gilt yields have remained volatile, seeing upward pressure from perceived stickier inflation at times and downward pressure from falling inflation and a struggling economy at other times.

- 2.5.5 On 31st March 2024 the PWLB certainty rates for maturity loans were 4.74% for 10-year loans, 5.18% for 20-year loans and 5.01% for 50-year loans. Their equivalents on 31st March 2023 were 4.33%, 4.70% and 4.41% respectively.
- 2.5.6 The cost of short-term borrowing from other local authorities has generally risen with base rate over the year. Interest rates peaked at around 7% towards the later part of March 2024 as many authorities required cash at the same time. These rates fell back to more normal market levels in April 2024.
- 2.5.7 A new HRA PWLB rate which is 0.4% below the certainty rate was made available from 15 June 2023. This rate will now be available to June 2025. The discounted rate is to support Local Authorities borrowing for Housing Revenue Accounts for the delivery of social housing and for refinancing existing HRA loans.

2.6 Borrowing Activity

- 2.6.1 As outlined in the Treasury Strategy, the Council's chief objective when borrowing has been to strike an appropriately low risk balance between securing lower interest costs and achieving cost certainty over the period for which funds are required, with flexibility to renegotiate loans should the Council's long-term plans change being a secondary objective. The borrowing strategy continues to address the key issue of affordability without compromising the longer-term stability of the debt portfolio. The Council pursued its strategy of keeping borrowing and investments below their underlying levels, known as internal borrowing.
- 2.6.2 In terms of borrowing, long-term loans maturing greater than one year totalled £641.1 million and short-term loans maturing within 12 months (excluding interest accrued) totalled £66.2 million (£512.8 million and £101.0 million 31 March 2023), an overall increase of £93.5 million. Appendix 2 details repayments of long-term loans during the year and short-term loans outstanding as at 31 March 2024.
- 2.6.3 The Council has an increasing CFR due to the capital programme and an estimated borrowing requirement as determined by the Liability Benchmark (see Appendix 5), which also considers usable reserves and working capital. The Council's chief objective when borrowing has been to strike an appropriately low risk balance between securing low interest costs and achieving cost certainty over the period for which funds are required. Having considered the appropriate duration and structure of the borrowing need based on realistic projections, it was decided to take a combination of short-term borrowing and longer-term repayment loans.
- 2.6.4 The Council borrowed £190.0 million of new long-term Equal Instalment of Principal (EIP) and maturity loans from the PWLB in 2023/24, of which £30.0 million was taken to replace 3 LOBOs (Lender's Option Borrower's Option), see paragraph 2.6.8 below.

	Amount £m	Rate %	Duration	Start date	Maturity date
EIP Loans					
PWLB (643579)	10.0	5.01	18 years	27 Jul 23	27 Jul 41
PWLB (659904)	10.0	5.06	15 years	21 Sep 23	21 Sep 38
PWLB (660447)	10.0	5.08	15 years	22 Sep 23	22 Sep 38
PWLB (661522)	10.0	5.00	14 years	27 Sep 23	27 Sep 37
PWLB (674705)	10.0	5.02	14 years 11 months	13 Nov 23	13 Oct 38
PWLB (677193)	10.0	4.85	15 years	22 Nov 23	22 Nov 38
PWLB (680811)	20.0	4.83	12 years	6 Dec 23	6 Dec 35
PWLB (685435)	20.0	4.59	13 years	20 Dec 23	20 Dec 36
PWLB (685834)	20.0	4.37	13 years	21 Dec 23	21 Dec 36
PWLB (711011)	10.0	5.42	2 years 1 month	13 Mar 24	13 Apr 26
PWLB (711013)	10.0	4.75	13 years	13 Mar 24	13 Mar 37
PWLB (712740)	10.0	4.59	14 years	19 Mar 24	19 Mar 38
PWLB (713074)	10.0	4.64	14 years	20 Mar 24	20 Mar 38
Maturity Loans					
PWLB (673622)	10.0	5.05	5 years 7 months	9 Nov 23	9 Jun 29
PWLB (675743)	10.0	4.94	5 years 1 month	16 Nov 23	16 Dec 28
PWLB (678066)	10.0	4.81	4 years 1 month	24 Nov 23	24 Dec 27
Total	190.0				

An EIP loan pays back principal over the life of the loan, and the interest associated with the loan goes down as the principal outstanding reduces.

- 2.6.5 As the bank base rate continued to rise during the period along with PWLB rates, the Council took advantage of a limited amount of medium-term loans over a 2-to-3-year time frame, achieving slightly lower interest rates for the period compared to the PWLB. The table below shows £10.0 million of new loans taken during 2023/24, there are further 3-year loans totalling £25.0 million taken in 2022/23 still outstanding at 31 March 2024.

	Amount £m	Rate %	Start date	Maturity date
South Yorkshire Mayoral Combined Authority	5.0	5.40	17 Nov 23	17 Nov 25
Oxfordshire County Council	5.0	5.00	22 Feb 24	22 Jan 27
Total	10.0			

- 2.6.6 Fixed rate loans account for 95.19% of total long-term debt (see also Appendix 5) giving the Council stability in its interest costs. The maturity profile for all long-term loans is shown in Appendix 3 and shows that no more than 8.36% of all debt is due to be repaid in any one year. This is good practice as it reduces the Council's exposure to a substantial borrowing requirement in any one particular future year, when interest rates might be at a relatively high level.
- 2.6.7 The primary source of the Council's borrowing is from the Governments PWLB representing 82.66% of total external borrowing.
- 2.6.8 The Council repaid £30.6 million of LOBO loans in 2023/24 and continues to hold £30.9 million of LOBO loans which represents 4.63% of total external borrowing. LOBO loans are where the lender has the option to propose an increase in the interest rate at set

dates, following which the Council has the option to either accept the new rate or to repay the loan at no additional cost. Three banks exercised their option to propose an increase in the interest rates during the year hence these loans were repaid. As mentioned in paragraph 2.6.4, these LOBO's were replaced with PWLB loans.

2.6.9 In terms of debt rescheduling, the premium charge for early repayment of PWLB debt remained relatively expensive for the loans in the Council's portfolio and therefore unattractive for debt rescheduling activity in 2023/24.

2.6.10 The average long-term borrowing rate for 2023/24 for the Council's long-term loans outstanding was 4.07% (3.67% 2022/23).

2.7 Trends in Treasury Management Activity

2.7.1 Appendix 4 shows the Council's borrowing and investment trends over the last 6 years. This highlights the current trend of borrowing shorter and longer term to fund cashflow.

2.8 Risk and Compliance Issues

2.8.1 The Council reports that all treasury management activities undertaken during the year complied fully with the CIPFA Code of Practice and the Council's approved Treasury Management Strategy, including the prudential indicators. Details can be found in Appendix 5. Indicators relating to affordability and prudence are highlighted in this appendix.

2.8.2 When the Council has received unexpected monies late in the day, officers have no alternative but to put the monies into the Barclays Business Reserve Account overnight. The largest daily amount deposited in this account overnight as a result of unexpected late receipts was £3.7 million. Whilst this is not an ideal situation, the Council is still within investment limits as per the Treasury Management Strategy which is set at £10.0 million per counterparty.

2.8.3 In line with Council Treasury Management Strategy, the Council has not placed any direct investments in companies as defined by the Carbon Underground 200.

2.8.4 The Council is aware of the risks of passive management of the treasury portfolio and, with the support of the Council's consultants (Arlingclose), has proactively managed the debt and investments over the year.

2.8.5 The CIPFA Code of Practice requires that treasury management performance be subject to regular member scrutiny. The Corporate Governance and Audit Committee performs this role and members have received reports on strategy, half yearly monitoring and now the outturn for the year 2023/24. Training was provided to Members in January 2024.

Looking Ahead – Treasury Management Developments in 2024/25

2.9 Re-financing/re-payment of current Long-Term Borrowing

2.9.1 As outlined within the Council approved Treasury Management Strategy 2024/25, the Council will continue to look to repay existing long-term debt when the opportunity arises where it becomes beneficial for the Council to do so.

2.9.2 Council officers will liaise with the Council's external Treasury Management advisors, Arlingclose, to review lender options, and proceed if they are considered to be in the longer-term best interests of the Council.

2.10 Loan Funding Sources

2.10.1 The Council may be presented with additional sources of long-term funding at certain points in time, beyond those currently listed in the Council's current Treasury Management Strategy. These may be at preferential rates of interest and therefore the Service Director Finance (Section 151 Officer) will look to maximise the use of source funds when it is preferential to do so.

2.11 Investment Opportunities

2.11.1 The Service Director Finance, supports the approach that the borrowing and investment strategy for 2024/25 continues to place emphasis on the security and liquidity of the Council's balances.

2.11.2 The investment in the CCLA property fund (see paragraphs 2.4.5 to 2.4.9) is part of a longer-term investment strategy to mitigate against any short-term market volatility or risk. As this fund has no defined maturity date its performance and continued suitability in meeting the Council's investment objectives is regularly reviewed. Strategic fund investments are made in the knowledge that capital values will move both up and down on months, quarters and even years; but with the confidence that over a longer period total returns will exceed cash interest rates.

2.12 New Borrowing

2.12.1 As mentioned previously, the Council has an increasing CFR due to the capital programme. The Council's current approach to fund the capital plan is to use a combination of short and longer-term borrowing. Unfortunately borrowing rates remain high and are likely to stay high in the near term. As short and medium-term rates remain slightly lower over a shorter time frame compared to longer-term, the Council will continue to borrow this way to minimise borrowing costs, although resulting in a higher proportion of debt that is not fixed over longer periods.

2.12.2 The base rate is expected to fall slightly in 2024/25. Long-term PWLB loans will be taken if gilt yields drop and the opportunity to take those fixed rate loans are presented.

2.12.3 The Council's borrowing decisions are not predicated on any one outcome for interest rates and a balanced portfolio of short and long-term borrowing will be maintained considering the appropriate duration and structure of the borrowing need based on realistic projections, and with ongoing consultation with Arlingclose.

2.12.4 As noted in the 2024/25 Treasury Management Strategy report, the Council will also consider the opportunity to arrange forward starting loans (with alternative lenders as these are not available through the PWLB), where the interest rate is fixed in advance, but the cash is received in later years. This would enable certainty of cost to be achieved without suffering a cost of carry in the intervening period. Again, this would only be undertaken after having considered the appropriate duration and structure of the

borrowing need based on realistic projections, and with ongoing consultation with Arlingclose.

3 Implications for the Council

3.1 Council Plan

N/A

3.2 Financial Implications

Any changes in assumed borrowing and investment requirements, balances and interest rates will be reflected in revenue budget monitoring reports during the year.

3.3 Legal Implications

*Fitch short/long term ratings, except Aviva MMF (highest Moody rating). See next page for key. ** MMF – Money Market Fund. These funds are domiciled in Ireland for tax reasons, but the funds are made up of numerous diverse investments with highly rated banks and other institutions. The credit risk is therefore spread over numerous countries, including the UK. The exception to this is the Aviva Government Liquidity Fund which invests directly in UK government securities and in short-term deposits secured on those securities.

Ave Base rate (Bank of England)	5.0%	2.3%	0.2%	0.1%	0.7%	0.7%
Ave LT Borrowing rate (1)	5.1%	3.8%	1.9%	2.3%	2.4%	2.5%

(1) Based on average PWLB rate throughout the year on a 25 to 30 year loan (less 0.2% PWLB certainty rate) repayable on maturity.

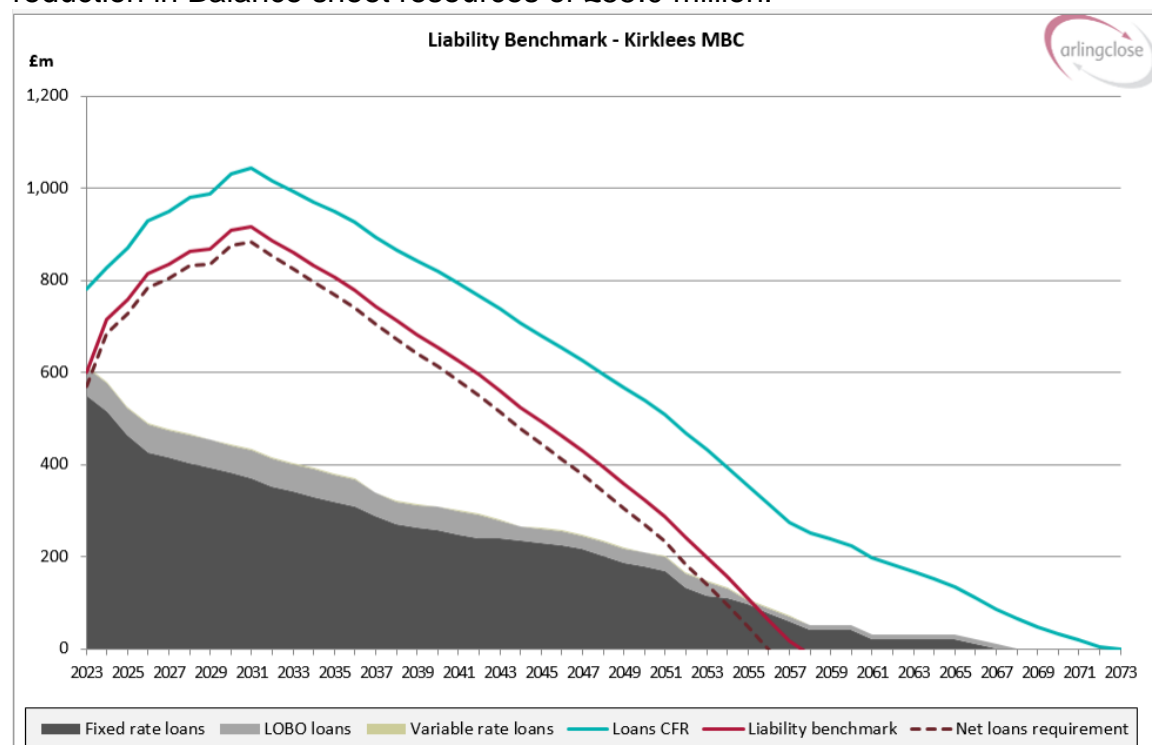

Treasury Management Prudential Indicators

Liability Benchmark

This new indicator compares the Council's actual existing borrowing against a liability benchmark that has been calculated to show the lowest risk level of borrowing. The liability benchmark is an important tool to help establish whether the Council is likely to be a long-term borrower or long-term investor in the future, and so shape its strategic focus and decision making. It represents an estimate of the cumulative amount of external borrowing the Council must hold to fund its current capital and revenue plans while keeping treasury investments at the minimum level of £30.0 million required to manage day-to-day cash flow.

	31.03.23 actual £m	31.03.24 actual £m	31.03.25 forecast £m	31.03.26 forecast £m
Loans CFR	781.5	823.5	872.6	942.9
Less: Balance sheet resources	210.6	155.3	144.0	144.0
Net loans requirement	570.9	668.2	728.6	798.9
Plus: Liquidity allowance	30.0	30.0	30.0	30.0
Liability benchmark	600.9	698.2	758.6	828.9
Existing borrowing	613.8	707.3	653.7	594.6

Following on from the medium-term forecast above, the long-term liability benchmark for 2023/24 includes capital expenditure funded by borrowing of £67.0 million, minimum revenue provision on new building capital expenditure based on a 50-year asset life and reduction in Balance sheet resources of £55.0 million.

The total liability benchmark is shown in the chart above together with the maturity profile of the Council's existing borrowing. The red line is the liability benchmark reaching a peak in 2032 highlighting the gap between current borrowing identified in grey, which is reducing over time with repayments, and the additional borrowing required to fund the capital plan.

Maturity Structure of Borrowing

This indicator is set to control the Authority's exposure to refinancing risk. The upper and lower limits on the maturity structure of all borrowing were:

	Upper limit	Lower limit	31.03.24 actual	Complied
Under 12 months	20%	0%	4%	Yes
12 months and within 24 months	20%	0%	5%	Yes
24 months and within 5 years	60%	0%	11%	Yes
5 years and within 10 years	80%	0%	11%	Yes
10 years and above	100%	20%	69%	Yes

Time periods start on the first day of each financial year. The maturity date of borrowing is the earliest date on which the lender can demand repayment. LOBO options of £30.9 million have a potential repayment date during 2024/25 and have been included in the under 12 months line.

Long term Treasury Management Investments

The purpose of this indicator is to control the Council's exposure to the risk of incurring losses by seeking early repayment of its investments. The prudential limits on the long-term treasury management limits are:

	2023/24	2024/25	2025/26	No fixed date
Limit on principal invested beyond year end	n/a	n/a	n/a	n/a
Actual principal invested beyond year end	£10.0m	£10.0m	£10.0m	£10.0m
Complied	Yes	Yes	Yes	Yes

Long-term investments with no fixed maturity date include strategic pooled funds, real estate investment trusts and directly held equity but exclude money market funds and bank accounts with no fixed maturity date as these are considered short-term.

Interest Rate Exposures

Bank Base Rate rose by 1.00% during the year from 4.25% on 1st April 2023 to 5.25% on 31 March 2024.

For context, the changes in interest rates during the quarter were:

	31.03.23	31.03.24
Bank Rate	4.25%	5.25%
1-year PWLB certainty rate, maturity loans	4.78%	5.36%
5-year PWLB certainty rate, maturity loans	4.31%	4.68%
10-year PWLB certainty rate, maturity loans	4.33%	4.74%
20-year PWLB certainty rate, maturity loans	4.70%	5.18%
50-year PWLB certainty rate, maturity loans	4.41%	5.01%

While fixed rate borrowing can contribute significantly to reducing the uncertainty surrounding future interest rate scenarios, the pursuit of optimum performance justifies retaining a degree of flexibility through the use of variable interest rates on at least part of the treasury management portfolio. The Prudential Code requires the setting of upper limits for both variable rate and fixed interest rate exposure:

	Limit Set 2023/24	Actual 2023/24
Interest at fixed rates as a percentage of net interest payments	60% - 100%	95%
Interest at variable rates as a percentage of net interest payments	0% - 40%	5%

The interest payments were within the limits set.

Glossary of Treasury Terms

Authorised Limit	The affordable borrowing limit determined in compliance with the Local Government Act 2003 (English and Welsh authorities) and the Local Government in Scotland Act 2003. This Prudential Indicator is a statutory limit for total external debt. It is set by the Authority and needs to be consistent with the Authority's plans for capital expenditure financing and funding. The Authorised Limit provides headroom over and above the <i>Operational Boundary</i> to accommodate expected cash movements. Affordability and prudence are matters which must be taken into account when setting this limit.
Annuity	Method of repaying a loan where the payment amount remains uniform throughout the life of the loan, therefore the split varies such that the proportion of the payment relating to the principal increases as the amount of interest decreases.
Balances and Reserves	Accumulated sums that are maintained either earmarked for specific future costs or commitments or generally held to meet unforeseen or emergency expenditure.
Bank Rate	The official interest rate set by the Bank of England's Monetary Policy Committee and what is generally termed at the "base rate". This rate is also referred to as the 'repo rate'.
Basis Point	1/100th of 1%, i.e. 0.01%
Bill	A certificate of short-term debt issued by a company, government or other institution, tradable on the financial market
Bond	A certificate of debt issued by a company, government, or other institution. The bond holder receives interest at a rate stated at the time of issue of the bond. The price of a bond may vary during its life.
Capital Expenditure	Expenditure on the acquisition, creation or enhancement of capital assets.
Capital Financing Requirement (CFR)	The Council's underlying need to borrow for capital purposes representing the cumulative capital expenditure of the local authority that has not been financed.
Capital gain or loss	An increase or decrease in the capital value of an investment, for example through movements in its market price.
Capital growth	Increase in the value of the asset (in the context of a collective investment scheme, it will be the increase in the unit price of the fund).
Capital receipts	Money obtained on the sale of a capital asset.
Certainty Rate	The government has reduced by 20 basis points (0.20%) the interest rates on loans via the Public Works Loan Board (PWLb) to principal local authorities who provide information as specified on their plans for long-term borrowing and associated capital spending.
CIPFA	Chartered Institute of Public Finance and Accountancy.
Collective Investment Schemes	Funds in which several investors collectively hold units or shares. The assets in the fund are not held directly by each investor, but as part of a pool (hence these funds are also referred to as 'Pooled Funds'). Unit Trusts and Open-Ended Investment Companies are types of collective investment schemes/pooled funds.
Corporate Bonds	Corporate bonds are bonds issued by companies. The term is often used to cover all bonds other than those issued by governments in their own currencies and includes issues by companies, supranational organisations and government agencies.
Corporate Bond Funds	Collective Investment Schemes investing predominantly in bonds issued by companies and supranational organisations.
CPI <i>Also see RPI</i>	Consumer Price Index. (This measure is used as the Bank of England's inflation target.)
Cost of carry	When a loan is borrowed in advance of requirement, this is the difference between the interest rate and (other associated costs) on the loan and the income earned from investing the cash in the interim.
Counterparty List	List of approved financial institutions with which the Council can place investments.

Credit Default Swap (CDS)	A Credit Default Swap is similar to an insurance policy against a credit default. Both the buyer and seller of a CDS are exposed to credit risk. Naked CDS, i.e. one which is not linked to an underlying security, can lead to speculative trading.
Credit Rating	Formal opinion by a registered rating agency of a counterparty's future ability to meet its financial liabilities; these are opinions only and not guarantees.
Debt Management Office (DMO)	The DMO is an Executive Agency of Her Majesty's Treasury and provides direct access for local authorities into a government deposit facility known as the Debt Management Account Deposit Fund (DMADF). All deposits are guaranteed by HM Government and therefore have the equivalent of a sovereign triple-A credit rating.
Diversification / diversified exposure	The spreading of investments among different types of assets or between markets in order to reduce risk.
Derivatives	Financial instruments whose value, and price, are dependent on one or more underlying assets. Derivatives can be used to gain exposure to, or to help protect against, expected changes in the value of the underlying investments. Derivatives may be traded on a regulated exchange or traded 'over the counter'.
ECB	European Central Bank
Fair Value	Fair value is defined as a sale price agreed to by a willing buyer and seller, assuming both parties enter the transaction freely. Many investments have a fair value determined by a market where the security is traded.
Federal Reserve	The US central bank. (Often referred to as "the Fed")
Floating Rate Notes	A bond issued by a company where the interest rate paid on the bond changes at set intervals (generally every 3 months). The rate of interest is linked to LIBOR and may therefore increase or decrease at each rate setting.
GDP	Gross domestic product – also termed as "growth" in the economy. The value of the national aggregate production of goods and services in the economy.
General Fund	This includes most of the day-to-day spending and income. (All spending and income related to the management and maintenance of the housing stock is kept separately in the Housing Revenue Account).
Gilts (UK Govt)	Gilts are bonds issued by the UK Government. They take their name from 'gilt-edged': being issued by the UK government, they are deemed to be very secure as the investor expects to receive the full face value of the bond to be repaid on maturity.
Housing Revenue Account (HRA)	A ring-fenced account of all housing income and expenditure, required by statute.
IFRS	International Financial Reporting Standards.
Income Distribution	The payment made to investors from the income generated by a fund; such a payment can also be referred to as a 'dividend'.
Local Authority Property Fund (LAPF)	A pooled property collective investment scheme for Churches, Charities and Local Authorities. (see Collective Investment Scheme).
Liability Benchmark	Term in CIPFA's Risk Management Toolkit which refers to the minimum amount of borrowing required to keep investments at a minimum liquidity level (which may be zero).
LOBOs	LOBO stands for 'Lender's Option Borrower's Option'. The underlying loan facility is typically long term and the interest rate is fixed. However, in the LOBO facility the lender has the option to call on the facilities at pre-determined future dates. On these call dates, the lender can propose or impose a new fixed rate for the remaining term of the facility and the borrower has the 'option' to either accept the new imposed fixed rate or repay the loan facility.
Maturity	The date when an investment or borrowing is repaid.
Maturity profile	A table or graph showing the amount (or percentage) of debt or investments maturing over a time period. The amount or percent maturing could be shown on a year-by-year or quarter-by-quarter or month-by-month basis.

MiFID II	MiFID II replaced the Markets in Financial Instruments Directive (MiFID I) from 3 January 2018. It is a legislative framework instituted by the European Union to regulate financial markets in the bloc and improve protections for investors.
Minimum Revenue Provision (MRP)	An annual provision that the Authority is statutorily required to set aside and charge to the Revenue Account for the repayment of debt associated with expenditure incurred on capital assets.
Money Market Funds (MMF)	Pooled funds which invest in a range of short term assets providing high credit quality and high liquidity.
Net Asset Value (NAV)	A fund's net asset value is calculated by taking the current value of the fund's assets and subtracting its liabilities.
Operational Boundary	This is the limit set by the Authority as its most likely, i.e. prudent, estimate level of external debt, but not the worst case scenario. This limit links directly to the Authority's plans for capital expenditure, the estimates of the Capital Financing Requirement (CFR) and the estimate of cashflow requirements for the year.
Pooled funds	See Collective Investment Schemes (above).
Premiums and Discounts	In the context of local authority borrowing, (a) the premium is the penalty arising when a loan is redeemed prior to its maturity date and (b) the discount is the gain arising when a loan is redeemed prior to its maturity date. If on a £1 million loan, it is calculated* that a £100,000 premium is payable on premature redemption, then the amount paid by the borrower to redeem the loan is £1,100,000 plus accrued interest. If on a £1 million loan, it is calculated that a £100,000 discount receivable on premature redemption, then the amount paid by the borrower to redeem the loan is £900,000 plus accrued interest. PWLB premium/discount rates are calculated according to the length of time to maturity, current market rates (plus a margin), and the existing loan rate which then produces a premium/discount dependent on whether the discount rate is lower/higher than the coupon rate. *The calculation of the total amount payable to redeem a loan borrowed from the Public Works Loans Board (PWLB) is the present value of the remaining payments of principal and interest due in respect of the loan being repaid prematurely, calculated on normal actuarial principles. More details are contained in the PWLB's lending arrangements circular.
Private Finance Initiative (PFI)	Private Finance Initiative (PFI) provides a way of funding major capital investments, without immediate recourse to the public purse. Private consortia, usually involving large construction firms, are contracted to design, build, and in some cases manage new projects. Contracts can typically last for 30 years, during which time the asset is leased by a public authority.
Investment Property	Property (land or a building or part of a building or both) held (by the owner or by the lessee under a finance lease) to earn rentals or for capital appreciation or both.
Prudential Code	Developed by CIPFA and introduced on 01/4/2004 as a professional code of practice to support local authority capital investment planning within a clear, affordable, prudent and sustainable framework and in accordance with good professional practice.
Prudential Indicators	Indicators determined by the local authority to define its capital expenditure and asset management framework. They are designed to support and record local decision making in a manner that is publicly accountable; they are not intended to be comparative performance indicators between authorities.
PWLB	Public Works Loans Board. It is a statutory body operating within the United Kingdom Debt Management Office, an Executive Agency of HM Treasury. The PWLB's function is to lend money from the National Loans Fund to local authorities and other prescribed bodies, and to collect the repayments.
Revenue Expenditure	Expenditure to meet the continuing cost of delivery of services including salaries and wages, the purchase of materials and capital financing charges.
Risk	Credit and counterparty risk The risk of failure by a counterparty to meet its contractual obligations to the organisation under an investment, borrowing, capital, project or partnership financing,

	<p>particularly as a result of the counterparty's diminished creditworthiness, and the resulting detrimental effect on the organisation's capital or current (revenue) resources.</p> <p>Liquidity risk The risk that cash will not be available when it is needed, that ineffective management of liquidity creates additional unbudgeted costs, and that the organisation's business/service objectives will be thereby compromised.</p> <p>Refinancing risk The risk that maturing borrowings, capital, project or partnership financings cannot be refinanced on terms that reflect the provisions made by the organisation for those refinancings, both capital and current (revenue), and/or that the terms are inconsistent with prevailing market conditions at the time.</p> <p>Interest Rate risk The risk that fluctuations in the levels of interest rates create an unexpected or unbudgeted burden on the organisation's finances, against which the organisation has failed to protect itself adequately.</p> <p>Legal risk The risk that the organisation itself, or an organisation with which it is dealing in its treasury management activities, fails to act in accordance with its legal powers or regulatory requirements, and that the organisation suffers losses accordingly.</p> <p>Operational risk The risk that an organisation fails to identify the circumstances in which it may be exposed to the risk of loss through fraud, error, corruption or other eventualities in its treasury management dealings, and fails to employ suitable systems and procedures and maintain effective contingency management arrangements to these ends. It includes the area of risk commonly referred to as operational risk.</p> <p>Market Risk The risk that, through adverse market fluctuations in the value of the principal sums an organisation borrows and invests, its stated treasury management policies and objectives are compromised, against which effects it has failed to protect itself adequately.</p>
RPI	Retail Prices Index. A monthly index demonstrating the movement in the cost of living as it tracks the prices of goods and services including mortgage interest and rent. Pensions and index-linked gilts are uprated using the CPI index.
SORP	Statement of Recommended Practice for Accounting (Code of Practice on Local Authority Accounting in the United Kingdom).
Specified Investments	Term used in the CLG Guidance and Welsh Assembly Guidance for Local Authority Investments. Investments that offer high security and high liquidity, in sterling and for no more than 1 year. UK government, local authorities and bodies that have a high credit rating.
Supported Borrowing	Borrowing for which the costs are supported by the government or third party.
Temporary Borrowing	Borrowing to cover peaks and troughs of cash flow, not to fund spending.
Term Deposits	Deposits of cash with terms attached relating to maturity and rate of return (interest).
Treasury (T) -Bills	Treasury Bills are short term Government debt instruments and, just like temporary loans used by local authorities, are a means to manage cash flow. Treasury Bills (T-Bills) are issued by the Debt Management Office and are an eligible sovereign instrument, meaning that they have a AAA-rating.
Treasury Management Code	CIPFA's Code of Practice for Treasury Management in the Public Services. The current Code is the edition released in 2021.
Treasury Management Practices (TMP)	Treasury Management Practices set out the manner in which the Council will seek to achieve its policies and objectives and prescribe how it will manage and control these activities.
Unsupported Borrowing	Borrowing which is self-financed by the local authority. This is also sometimes referred to as Prudential Borrowing.
Usable Reserves	Resources available to finance future revenue and capital expenditure.

Variable Net Asset Value (VNAV)	A term used in relation to the valuation of 1 share in a fund. This means that the net asset value (NAV) of these funds is calculated daily based on market prices.
Working Capital	Timing differences between income/expenditure and receipts/payments
Yield	The measure of the return on an investment instrument.
