

The council maintains its own in-house provision for print production and mail managed by the IT Service. We have been working together to reduce the mail handled across the council to deliver cashable savings. We have already more than halved our mail routes and are seeking a reduction of 65% of paper mail leaving the council in 24/25 and have been working towards that since July 2022. Our mail contract comes to an end in February 2025 and the best way to protect our price with a diminishing volume was to buy from a national aggregation through Crown Commercial Services.
