Introduction

This report identifies the site options put forward for inclusion in the draft Local Plan that have been rejected. The decision about whether to reject each option is based on a cumulative judgement of technical assessments and consultee responses about each site.

The first part of the report includes summary tables of the following rejected options:

 Local green space, local wildlife sites, remove from urban green space, strategic green infrastructure, urban green space

The summary of these options include:

- draft Local Plan reference
- address
- area in hectares
- summary of the assessment outcome

The second part of the report includes summary tables of the rejected development options which are:

• Employment, gypsy and traveller and travelling showpeople, housing, major development in the green belt (land at Storthes Hall), minerals extraction site, mixed use, safeguarded land

The summary of these options include:

- draft Local Plan reference
- address
- settlement position (whether the site is within, on the edge or detached from an existing settlement)
- whether the site is within the green belt
- whether the site is greenfield or brownfield
- area in hectares
- site capacity (employment floorspace in square metres, housing capacity by number of dwellings)
- technical assessment and consultee responses (colour coding explanation in Appendix A)
- green belt assessment conclusions (taken from the green belt review report)
- other reasons for rejection

Further information about these assessments can be found at the end of the summary tables.

The content of this report will be made available for comment during the draft Local Plan consultation.

Other reasons for rejection: A: Site overlaps with an accepted option, AE: Site overlaps with an accepted option and there are no exceptional circumstances to remove the site from the green belt, D: Land is now developed, O: the landowner is not willing to put the site forward for development, S: unconstrained site area is below the 0.4Ha threshold.

Appendix A

Transport Constraint

Green	Site access achievable and no significant impact on the SRN or local highway network
Amber	Evidence of some constraint but mitigation appears achievable and/or impact on the SRN or highway network requiring some degree of mitigation
Red	No current evidence that a satisfactory access could be achieved and/or significant impact on the SRN or highway network where mitigation cannot be programmed within the plan period

Flood Risk and Drainage Constraint

Green	No significant flood risk and surface water drainage can be achieved
Amber	Mitigation required, or drainage options require crossing third party land.
Red	Presence of flood risk Zone 3b (for all site options) 3a and 2 (for housing options) where mitigation is not viable or there is a significant surface water flooding or drainage constraint

Environmental Protection Constraint

Green	No significant constraints
Amber	Presence of constraint such as land contamination or proximity to serious
	noise sources such as a motorway but where mitigation could be achieved
Red	Serious level of constraint or multiple constraints

Biodiversity Constraint

Green	No significant constraints
Amber	Presence of or degree of impact on environmentally sensitive areas where
	removal of an area or mitigation could reduce impact to an acceptable level
Red	Serious impact on an environmentally sensitive area

Historic Environment Constraint

Green	No significant constraints.
Amber	Presence of or degree of impact on historic asset where mitigation could reduce impact to an acceptable level.
Red	Serious impact on an historic asset.

Open Space Constraint

Green	Development of the option would not result in the loss of an important open
	space, sport or recreation facility.
Amber	Development would impact on an open space, sport or recreation facility
	that may be important in meeting local needs.
Red	Development would significantly impact on open space provision resulting in
	the loss of an important open space, sport or recreation facility.

Education Constraint

Green	No immediate additional capacity required and a decreasing or moderately increasing trend for places
Amber	There is a need for additional capacity within the catchment of either the primary or secondary school and/or the site is of a significant size (50 dwellings or above)
Red	Where an option is of a size that would create a significant impact on the need for school places

Green Belt Constraint

Green	The site would present a reasonable extension relative to the settlement it abuts, would have little or no impact on the purposes of including land in the green belt and presents the opportunity to create a strong new defensible green belt boundary
Amber	The site is located adjacent to a part of the green belt edge where assessment has shown that development would have some detrimental impact on the purposes of including land in the green belt and/or the site does not present a strong new defensible green belt boundary but opportunity exists that could mitigate this impact, such as the minor alteration to the option boundary or the removal of some additional land from the green belt
Red	The site would not present a reasonable extension relative to the settlement it abuts and/or the site is located adjacent to a part of the green belt edge where assessment has shown that development would have a significant detrimental impact on the purposes of including land in the green belt, and/or it is located adjacent to a part of the green belt edge that is deemed to be significantly constrained and/or the option is remote from any settlement

Public Health Constraint

Green	No significant health problems noted
Amber	Health issue identified that can be reasonably mitigated against.
Red	Significant degree of health issue identified.

Other Constraints

Green	No significant other constraints
Amber	Evidence of some constraint where there is a reasonable prospect of
	mitigation.
Red	Significant or severe level of constraint or multiple constraints.
